

MARSDEN
SERVICES

**Medical Cleaning. Terminal Cleaning.
Clean Rooms. Surgery Centers.**

Medical Facility Services. Optimized.®

We are the CHEST certified experts that provide a clean and safe environment for your patients, employees and visitors.

Medical Facility Services. Optimized.®

We know that ensuring a clean and safe environment is critical to the success of your clinics, hospitals and medical facilities. An effective cleaning program has a direct impact on the health of your patients and employees.

The cleanliness of your facilities is paramount to promoting health, safety and improving morale. Simply put, our cleaning program contributes to maintaining an environment that promotes wellness.

The Marsden Advantage

At Marsden, we take pride in our ability to deliver consistent quality by following a thorough world-class quality assurance process.

Because of our extensive training, we know to ask the right questions so that we can anticipate and create a plan that addresses the specific needs of medical facilities. Our CHEST certified management team oversees our on-site performance and facilitates a culture of communication and accountability.

At the beginning of your contract period, your Marsden team will develop a detailed operations plan in exact accordance with your contract specifications. Our supervisors can use state-of-the-art web-based tools to track and monitor the quality and completion of duties in real time. We will perform regular inspections, and communicate with you to ensure that our work meets or exceeds expectations. Our Marsden Advantage Technology and Quality Assurance Program® captures eight key data points:

Time Keeping
Human Resources
Customer Surveys
Project Calendars

Work Orders
Inspections
Issue Resolution
Reporting

What is CHEST Certification?

Established by the American Hospital Association (AHA) and the Association for the Healthcare Environment (AHE), CHEST training and certification is part of a rigorous standard to improve efficacy of frontline cleaners in medical facilities. Our program includes detailed training and testing with a goal of increasing patient safety, efficiency, and maintaining consistent and reliable environmental services standards. Utilizing CHEST certified cleaners delivers greater patient satisfaction, better experience of care and improved outcomes.

For more information on our CHEST certified cleaning professionals, as well as our additional service offerings including our security and HVAC divisions,, visit www.marsden.com.
